

CaddFX Professional Services **...Supporting all your Engineering needs**

Product Design & Engineering Support

CaddFX Design Services is a full-service product Design and Engineering firm. We support full engineering development of all processes. We have a team of Mechanical Engineers who have worked together as a team on a number of design and drafting projects for our clients

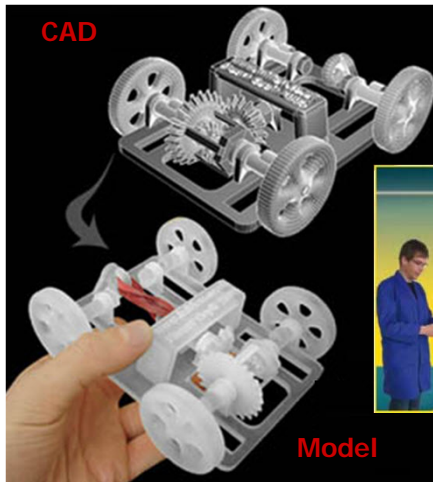

3D Modeling

Among typical applications of design and customer requirements, we will determine scope, analysis and all applicable specifications.

CaddFX has the experience working on 3D modeling as well as creation of production drawings in a variety of fields including machine tools, fabrication, sheet metal and castings.

With our extensive experience, we present our clients with practical, economical and safe design solutions. We can do this by providing “physical” prototype models of any part from your 3D design in a matter of hours with our 3D print services.

Autodesk®

Authorized Value Added Reseller
Silver Partner

We supply Training and Software for the Manufacturing Industry

- AutoCAD
- AutoCAD Mechanical
- AutoCAD Electrical
- Autodesk Inventor
- 3ds Max

Engineering

- Complete Product Design
- Product Design Support
- 2D & 3D Modeling
- Drafting & Detailing
- Tooling Design and Support
- Analysis
- Jigs, Fixture, gauges design

Design Support

- 3D / Rendered drawings
- Technical Illustration
- Conversion of legacy drawings
- Parts List & B.O.M
- Operating & Instruction Manuals
- Product styling
- Advanced CAD surfacing
- Value engineering

Other Services we Offer

- Engineering Personnel Placement
- Mechanical Design & Engineering
- Drawing scanning
- Drawing conversion
- 3D Prototype Printing
- Reverse Engineering
