

## About Cadapult FM:

Cadapult FM is a cost-effective software solution for facility management and real estate productivity. We have been solving facilities and real estate problems for our customers since 1986 through a combination of software, consulting, customization and production services. Cadapult FM is a solution for CAFM/IWMS/CMMS challenges faced by educational, commercial, government, healthcare and real estate professionals. Typical solutions include:

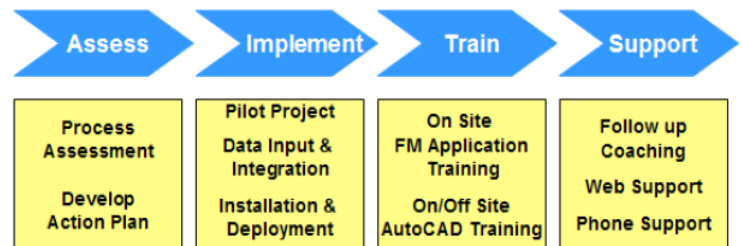

- Space and Workplace Management
- Maintenance Management and Work Orders
- Real Estate and Property Management
- Sustainability and Emergency Preparedness

Lease & Real Estate Drill Down Process

## Flexible and Scalable Implementation Options:

Cadapult FM is a scalable solution which runs in SQL or Oracle environments. It utilizes and analyzes existing data being used in your financial, HR, sales and marketing databases, and communicates information in standard and graphical reports in a web-based environment. The software can be installed on your server or can be run as a cloud-based solution on our Cadapult Cloud. Information and graphics can be used internally on your systems as well as specifics being displayed to the public through the internet.

## Our Commitment:

When you purchase a Cadapult FM solution you get the support of our entire team. From the beginning needs analysis to understand both immediate and long-term goals, to the implementation, and through our value-based ongoing support and maintenance programs, we are with you every step of the way. Many of our world class customers have used our software for decades and continue to add our new modules as their needs grow. Our ability to write custom applications that are fully integrated into the system is a service we offer over and above what other resellers and software companies typically offer.

## Our Services:

Cadapult FM has teamed up with CaddFX to provide complete support in all phases of planning and implementation of CAFM and IWMS solutions. CaddFX has worked with many facility organizations and real estate companies and offers complete support in all phases of planning and implementation as well as continued health checks to ensure ongoing customer satisfaction. Our team offers turn-key solutions by incorporating services that fulfill all of the necessary requirements such as:

- Initial and ongoing data linking and support
- Integration to products like those provided by JD Edwards, MRI, etc.
- Needs and workflow analysis
- Onsite as-built and record condition survey for space, personnel and asset data collection
- Customization services for any of the Cadapult FM applications
- AutoCAD and Revit (BIM) Integration and training through our mobile lab or the web
